

Turning on **French Subtitles** for English YouTube videos

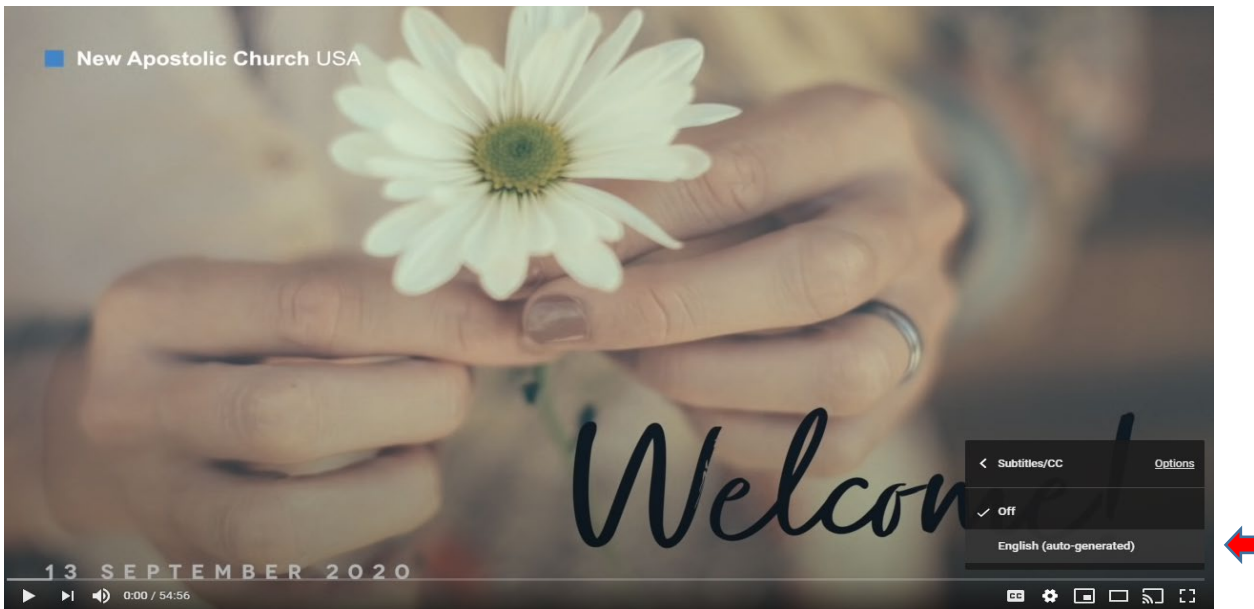

To start go to YouTube and go to the “New Apostolic Church USA” channel found at <https://www.youtube.com/user/NewApostolicChurchUS> once there select the service you would like to view.

When you first go to the video press the setting button on the lower right hand corner of the video.

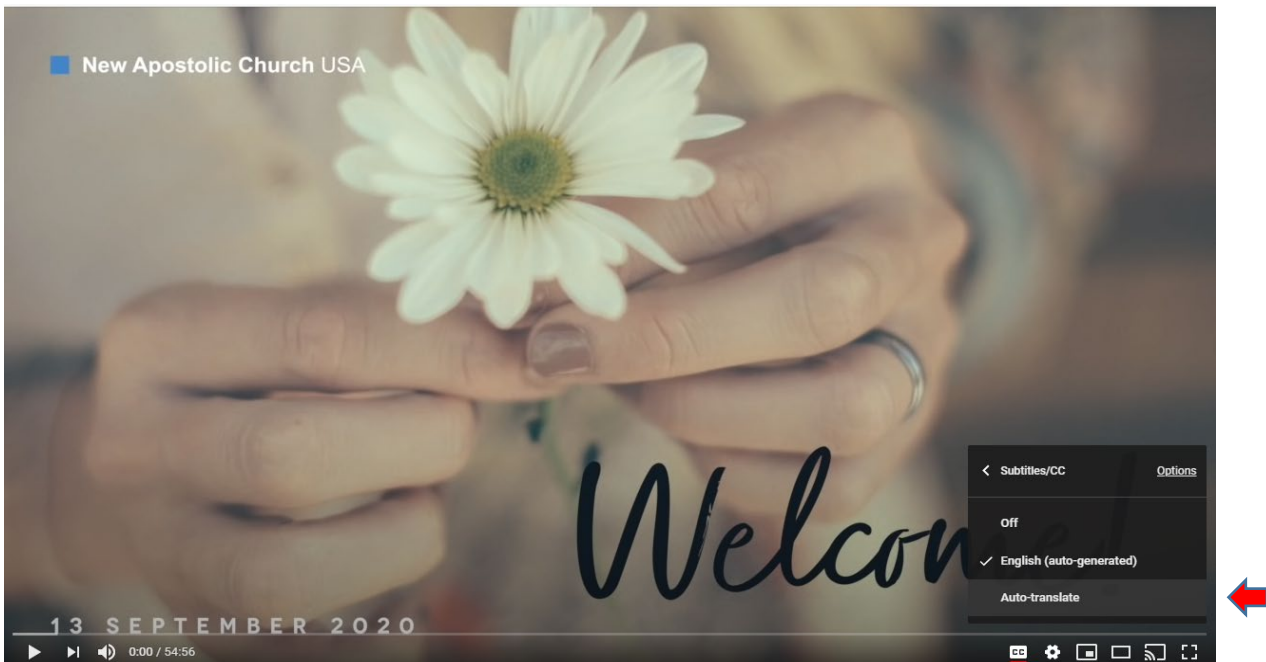

Once you have clicked on settings the following options will pop up. Click on Subtitles/CC.

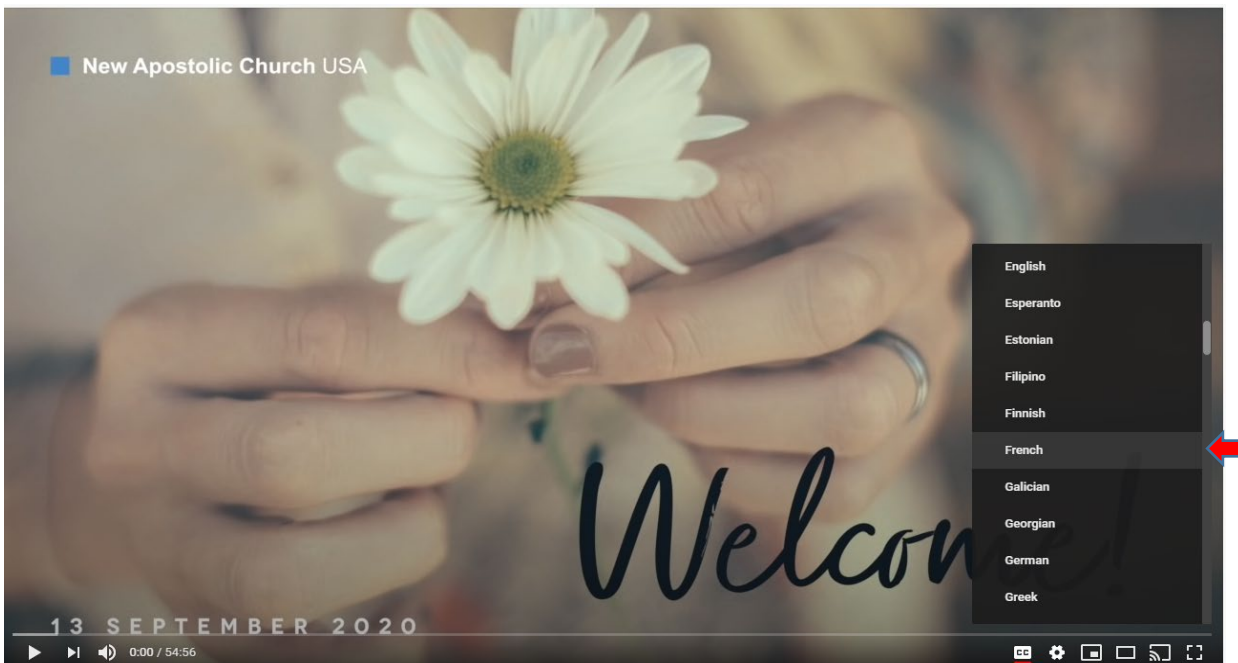

Then click on the English (auto-generated) option.

You will have to click on the Subtitles/CC option again.

You will then get the option to Auto-translate, press on this.

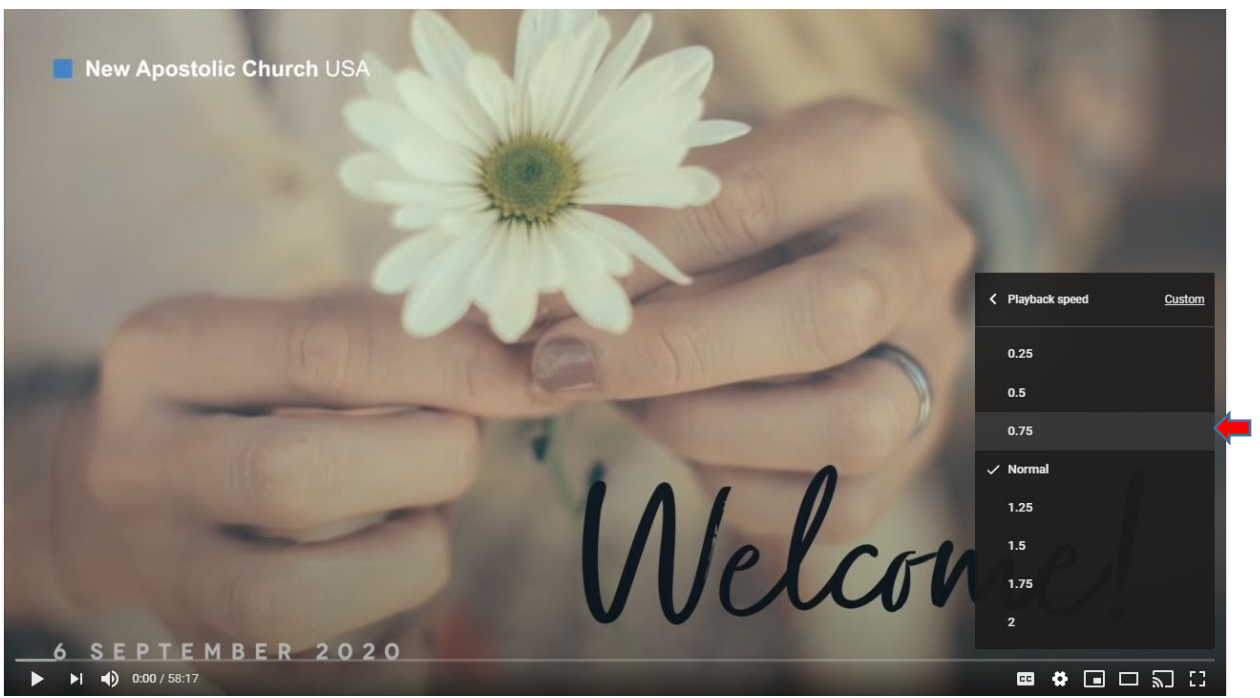

The Auto-translate option will give you the option to pick from a large list of languages including French, Spanish, and Swahili. Once you click on your desired language, subtitles will pop up on the video screen in said desired language.

To slow down the speed of the video to allow viewers more time to read the auto translated closed captions please follow these steps:

Click on the setting button again for this menu to pop up. Once this menu is open press on the Playback speed option.

By pressing on the Playback speed option it will give you the options listed. For many viewers 0.75 will be the appropriate speed but you can always slow it down further if needed.
